A Little About iFormulate

Founded in 2012 by
two experienced
industry professionals

Diverse experiences,
knowledge and wide
range of contacts

Polymers, materials science,
chemistry, imaging, dyes, pigments,
emulsion polymerisation, biocides,
pharma, agrochem, FMCG, food,
anti-counterfeiting, environmental,
formulation etc...

Consultancy, innovation, marketing,
business development, strategy,
regulatory, training, events, R&D

Complementary
Network of
Associates

Some of our Agrochemical Activities

Individual client projects

- Supporting formulation development and trouble shooting
- Scouting for novel formulation technologies
- Positioning new technologies in the market

Training

- Introduction to Agrochemical Formulation Strategies – in-person and online training via ATI (Informa)

Reports

- Agrow Formulations Report 2017 (Informa Agrow) – including some material from today's presentation
- Further in planning

Formulation Workshop: Topics

1. New solvents for agrochemical formulations, and scientific methods for selecting solvents (David Calvert)
2. What is happening to nanotechnology in agrochemical formulation? (Jim Bullock)
3. Mechanisms for adjuvancy in agrochemicals, and their role in formulation (David Calvert)
4. Formulation challenges for biopesticides (Jim Bullock)
